

# What is working well now in South Whitehall Township?

**Robust  
water  
supply  
system.**

My septic system is working just fine. Is there any need to change according to rules?

**High quality  
public water  
supply**

# What are the problem areas in South Whitehall Township?

# What SME tools or best practices are relevant to addressing these problems?

# What recommendations based on SME tools and best practices should we carry forward to the Comprehensive Plan Update?

North of Huckleberry Ridge -- Sewer expansions. Do we need a plan or not?

**5-year, or shorter, review**

Evaluating growth areas -- land use plan

Evaluate areas with aging septic systems and development management/mitigation efforts

Continuously follow emerging technologies and the best practices to plan and allow for 5G, high speed internet, etc.

Exploring alternative/green energy potential in Township (Solar, Wind, Geothermal, etc..)

Ensure development follows utility capacity

**Act 537 Plans - Sewer Facilities**

Consider green infrastructure efforts

Land use plan will guide utilities such as power and natural gas (PPL, UGI)

Explore benefits of capital improvements plans

Inventory where high speed internet/WIFI is publicly available throughout the Township and evaluate opportunities to increase availability (libraries, parks, etc)

Understanding interrelationships in order to create balance = Quality of Life

**EV charging stations in SWT**

**Incentives for green building**

Incentives for developers to infill where systems exist

Incentives for developers to extend systems

Climate and Energy Element -- LVPC 2014

**Act 167 Plans**
